

BUGGYPOD COMPATIBILITY

Pushchair guarantees vary. Use of a Buggypod, or any other accessories not manufactured by the pushchair company, may invalidate your pushchair guarantee.

The Buggypod box includes a set of size 51 mounting brackets as standard

Extra bracket sets and the connector bar adaptor are available separately from selected stockists

TBC = To Be Confirmed

**Now Bugaboo Compatible !
All you need is the Buggypod io and the Buggypod io
Conversion Kit for Bugaboo. See Notes below.**

Make	Model	Buggypod Smorph 2				Buggypod io				Notes. (The io has 7 leg settings. 1 is lowest, 7 is highest; 4 is marker for converted position)
		standard size 51 mounting brackets	size 70 mounting brackets	connector bar adaptor	Notes	standard size 51 mounting brackets	size 70 mounting brackets	connector bar adaptor	Optional front wheel (in io Conversion Kit)

PLEASE NOTE: Adding the Buggypod to a twin pushchair may create a particularly wide and heavy load to push around

Revelo does not guarantee that the Buggypod will fit every make and model of pushchair. Customers should always follow our guidelines:

The Buggypod can be attached to most buggies and pushchairs including twin buggies and 3 wheelers.

The strap of the mounting brackets can be tightened around most buggy and pushchair frames.

The frames can be oval, square, round, thick or thin.

Size 51 brackets fit frames up to 4 cm diameter. Size 70 brackets fit frames more than 4 cm diameter

The Buggypod is supplied with a set of size 51 brackets included. Size 70 brackets are available to purchase separately.

To assess whether the Buggypod will fit your pushchair, you should check that there are exposed fixture points

on two major frame tubes on the right hand side of your pushchair.

On the Buggypod Smorph, the rear fixture point needs to be approximately 35-43 cm from the floor.

On the Buggypod iO, the rear fixture point needs to be approximately 32-45 cm from the floor.

The front fixture point can be level with the rear fixture point or up to approx. 8 cm higher.

Buggypod Smorph 2:

Buggypod io:

You cannot fit a bracket around two parallel telescopic tubes, as the tubes may slide alongside each other or split apart when folding pushchair (e.g. Bebeconfort Loola).

You can fit the bracket on one telescopic tube if there is a gap of minimum 2 mm between the tubing (e.g. Mamas and Papas Pliko).

Check that the mounting brackets, once fitted, do not interfere with the braking system or folding mechanism of the host pushchair.

Check that the tube to which you are fitting the bracket is vertical (looking from the rear or front), so that the bracket and Buggypod will sit vertically too.

The front bracket can be fitted slightly higher than the rear bracket if it helps achieve a good connection.
The Buggypod seat will then tilt back gently (as with many pushchairs) and you may in any case prefer that.

You may find it helpful to look at the images of the Buggypod attached to a number of pushchair models in the Support pages at www.buggypod.com.
If you are still unsure about whether the Buggypod will fit your pushchair, you can call our Helpline in the UK on 0870 850 3463 (M-F, 09:30-17:00) or email us at support@revelo.co.uk and we shall endeavour to help you. .
Your local retailer may also be able to advise on fitting.
